Description

- Keenlon Iron Man - 2, with all chassis made of stainless steel.
- 4 powerful metal gear motors, with space for 4 encoders respectively
- Excellent ability of surmounting obstacles.
- Designed with plenty compatible mounting holes for various sensors, servo motors and arduino board.
- Up to 5 lbs. carrying capability.

Keenlon Iron Man - 2 is equipped with a high speed stainless steel chassis, off-road tires and four powerful metal gear motors. It can be freely driven on all-terrain rough roads. Keenlon Iron Man – 2, allows you to mount the modules above or inside the chassis according to your applications.

Supplier Product Code: **SKU KCH0202**

What's Included

- A steel cover kit
- Four metal gear motor (6V 33.5 220RPM)
- Four Off-road tires and connections

Address: Room 102-103, Bldg 2, #900 Zhongshan North Rd, Zhabei 200070, Shanghai, China.

Tel: +86-21-33870051; Fax: +86-21-33870051-806

General: info@keenlon.com; Tech Support: supportcenter@keenlon.com.

Specifications

- Ground clearance: 18mm.
- Recommended voltage: 6-9 V.
- Stall current at 6V: 4 A per motor.
- No-load current at 6 V: 300 mA per motor.
- No-load output shaft speed at 6 V: 220 RPM.
- Tire diameter: 80mm.
- Tire width: 40mm.

Dimensions

- Size: 193mm × 228mm × 80mm.
- Weight: 1.3 kg. (2.9 lb.)
